

AL SIRAJ DEVELOPERS

SYSTEM HANDOVER & SUPPORT CERTIFICATE

OFFICIAL DOCUMENT

CLIENT / OWNER / CEO Dilawar Khan	DEVELOPER COMPANY Mahad and Mahdi Developers
SOFTWARE PACKAGE AL SIRAJ DEVELOPERS ERP + CEO App	DEDICATED SUPPORT PERIOD 2 Months from Handover Date

01 Purpose & System Scope

AL SIRAJ DEVELOPERS is custom-designed to streamline town management, plot/shop records, sales, installment collections, expenses, cash/bank accounts, staff salaries, investor records, contractor payments, official receipts, and CEO mobile monitoring. The system provides clear real-time visibility, transparent calculations, and automated reporting to support smooth daily business administration.

02 Two-Month Dedicated Technical Assistance

Mahad and Mahdi Developers will provide **two (2) months** of dedicated technical support and assistance from the handover date. This includes smooth system onboarding, bug fixes, calculation verifications, and operational guidance. Any future feature expansions or new module additions beyond the delivered system scope can be planned and implemented upon mutual consultation.

03 Data Protection & Safety Guidelines

The software uses a high-performance local-first storage architecture with real-time cloud synchronization for maximum reliability. To maintain complete office data safety, regular local USB backups and periodic printouts of key summary reports are recommended as standard office administrative practices.

04 System Assurance & Contingency Care

The Developer utilizes robust database integrity safeguards to ensure reliable operation. In the event of hardware issues, power outages, or system environment disruptions, the Developer will provide active technical support to assist in restoring data and smooth system continuity.

05 Cloud Connectivity & Real-Time CEO Monitoring

Cloud synchronization provides real-time mobile app access, CEO notifications, and secure remote backup. Maintaining active office internet connectivity ensures seamless data updates between desktop computers and mobile devices.

06 Offline Operation & Automatic Sync

Offline operation allows continuous office data entry even during internet downtime. Any entries recorded offline will automatically upload and present for CEO approval as soon as internet connection is re-established.

07 Role-Based Security & CEO Approval System

To maintain office transparency and accuracy, the software features role-based access control, multi-step CEO approvals, system audit logs, and digital receipts. Office management maintains full administrative control over staff permissions and password security.

08 System Integrity & Best Usage

To ensure calculation accuracy and audit trail consistency, all financial and property transactions should be recorded through the software interface. Following standard computer security procedures ensures optimal long-term software performance.

09 Report Verification & Reconciliation

System receipts and reports reflect data entered by authorized office users. Timely review of pending approvals and daily summary reports ensures full accuracy across property files and town ledgers.

10 Handover Confirmation & Mutual Cooperation

This Certificate confirms successful software installation, completion of initial setup, and the official start of the 2-month dedicated technical support period. Both parties affirm their commitment to smooth cooperation and efficient business management.
